

# Staying longer in your home - checklist

This check list helps you with choosing a home that will suit your needs now and into the future. The questions refer to access, personal safety (e.g. falls prevention) and fire safety. The list can be used if you are considering living in a retirement village, residential park or any other housing arrangement. Remember that this is a tool only. It can also be used to assess your current home and help you consider possible future modifications. Some features may not be so important now but it may be good to check how easily they can be added to the home if necessary. Space is provided under each question for your own notes / comments.

Take along this questionnaire and a tape measure when you go looking for a new house / flat / unit. Ask questions. This is your life and your house must meet your needs.

Catalyst Foundation (including Seniors Information Service) and the South Australian Residential Parks Residents Association Inc. (SARPPRA) acknowledge the work of Liz Burge in compiling this checklist.

## Entering your house

1. How many steps are there for day-to-day entry into the house?

- Front     None     1 – 2     3+  
Back     None     1 – 2     3+

My notes:

2. Is there a deadlock on the front door?

- Yes     No

My notes:

3. Is there a handrail at each entry door to the house?

- Yes     It varies between doors     No handrails at all

My notes:

4. Is there space to open the front door or back door while using a wheelchair or walking frame?

- Yes     No

My notes:

## Staying longer in your home - checklist

5. How easy is it / might it be to move through the front or back doorways in a wheelchair or mobility aid such as a walking frame?

- Very easy       Easy       Somewhat difficult       Very difficult

My notes:

6. How easy would it be for an ambulance staff or a gurney to enter and exit your house quickly?

- Very easily       Somewhat easy       Challenging because of narrow pathways / hallways

My notes:

7. Are there steps or changes in ground level in the gardens? Could the garden be accessed by (or become easily accessible to) a person in wheelchair?

- Yes       No

My notes:

8. Is there space near the front or back door for a bench (or other waist-high item) to place shopping etc. while you open the front door?

- Yes       No

My notes:

### Moving around

9. How many of the doors (internal and external) have lever-type handles, as distinct from round knobs?

- All       Many       A few       None

My notes:

10. Are all areas accessible to a person using a wheelchair / walking frame?

- Most areas       Some areas       A few areas       None

My notes:

# Staying longer in your home - checklist

11. Corridors are, at minimum, 100cm wide.  
 Yes             No

My notes:

## Bathroom

12. How easily could you travel from the bedroom to the entry to your bathroom and toilet while using a wheelchair or walking frame?  
 Very easily             Somewhat easily             Not very easily

My notes:

13. Could a person in a wheelchair get their knees under the hand basin for easy use?  
 Yes             No

My notes:

14. How do the bathroom and toilet doors open?  
Bathroom:     inwards             outwards             slides into the wall cavity  
Toilet             inwards             outwards             slides into the wall cavity

My notes:

15. Is the size of the shower floor 110cm x 110cm or larger?  
 Yes     No     I don't know

My notes:

16. Is the shower floor:  
 Same level as bathroom floor     Lower than the bathroom floor a little     Other

My notes:

# Staying longer in your home - checklist

23. Is the oven sitting on a bench that is level with the hotplates?  
 Yes       No

My notes:

24. Are all cupboard handles bow or D-shaped (they are not round knobs) and suitable for using four fingers?  
 Yes       No

My notes:

## Light and power

25. Can you control all lighting levels inside the house (including daylight)?  
 Yes, all       Some       A few

My notes:

26. Can you increase lighting to areas when it's needed to perform tasks?  
 Yes       No

My notes:

27. How are the windows opened?  
 Pulling upwards       Sliding horizontally       Both methods       Other method

My notes:

28. Are the power points fitted approximately waist high (60cm or 2ft approx.) above the floor for easy access?  
 All of them       Some of them       A few of them       None

My notes:

## Staying longer in your home - checklist

29. Are the power points are also placed at least 50cm from the corners of each room for easy access?  
 All of them       Some of them       A few of them       None

My notes:

30. Any other things you have noticed? For example, any required improvements for foot traffic flows, safety issues, or more economic forms of energy.

My notes:

In brief the seven core livable design features elements include:

- A safe continuous and step-free path of travel from the street entrance and/or parking area to a dwelling entrance that is level
- At least one, level (step-free) entrance into the dwelling
- Internal doors and corridors that facilitate comfortable and unimpeded movement between spaces
- A toilet on the ground (or entry) level that provides easy access
- A bathroom that contains a hobless (step-free) shower recess
- Reinforced walls around the toilet, shower and bath to support the safe installation of grab rails at a later date
- A continuous handrail on one side of any stairway where there is a rise of more than 1 metre
